This information is based upon certain material factors or assumptions that were applied in drawing a conclusion or making a forecast or projection as reflected in the forward-looking statements, including the perception of historical trends, current conditions and expected future developments, as well as other factors that are believed to be appropriate in the circumstances. While the Corporation considers these assumptions to be reasonable based on information currently available to management, they may prove to be incorrect.

Non-IFRS Financial Measures and Additional IFRS Measures

This Annual Information Form and the documents incorporated by reference contain non-IFRS financial measures and additional IFRS measures. Net earnings available to common shareholders, which is an additional measure in accordance with International Financial Reporting Standards (IFRS), may be subdivided into two components consisting of:

- operating earnings available to common shareholders; and
- other items, which include the after-tax impact of any item that management considers to be of a non-recurring nature or that could make the period-over-period comparison of results from operations less meaningful.

Terms by which non-IFRS financial measures are identified include but are not limited to "operating earnings available to common shareholders", "operating earnings per share", "operating return on average common equity" and other similar expressions used to provide management and investors with additional measures to assess earnings performance. As well, "earnings before interest and taxes (EBIT)" and "earnings before interest, taxes, depreciation and amortization (EBITDA)" are non-IFRS financial measures used to provide management, investors and investment analysts with additional measures to evaluate and analyze the Corporation's results. However, non-IFRS financial measures do not have standard meanings prescribed by IFRS and are not directly comparable to similar measures used by other companies. Please refer to the appropriate reconciliations of these non-IFRS financial measures to measures prescribed by IFRS in Tables 1 and 2 on pages 18 and 19 of the 2012 Annual Report.

Terms by which additional IFRS measures are identified include "earnings before income taxes and discontinued operations", "net earnings from continuing operations" and "net earnings available to common shareholders". Additional IFRS measures are used to provide management and investors with additional measures to assess earnings performance. These measures are considered additional IFRS measures as they are in addition to the minimum line items required by IFRS and are relevant to an understanding of the entity's financial performance.

Ratings

The following table sets out ratings⁽¹⁾ given to the Corporation's outstanding securities as at December 31, 2012:

Specific Securities	DBRS	S&P
Long-term Debt (unsecured debentures)	A (High)	A+
Preferred Shares	Pfd-2 (High)	A- / P-1 (Low)

⁽¹⁾ The rating Trend of DBRS and the S&P rating Outlook are both "stable".

Credit ratings are intended to provide investors with an independent measure of the credit quality of the securities of a company and are indicators of the likelihood of payment and the capacity of a company to meet its obligations in accordance with the terms of each obligation. Descriptions of the rating categories for each of the agencies set forth below have been obtained from the respective rating agencies' websites.

These ratings are not a recommendation to buy, sell or hold the securities of the Corporation and do not address market price, nor other factors that might determine suitability of a specific security for a particular investor. The ratings also may not reflect the potential impact of all risks on the value of securities and are subject to revision or withdrawal at any time by the rating organization.

(a) Dominion Bond Rating Services (DBRS)

DBRS has different rating scales for short-term debt, long-term debt and preferred shares. The A (High) rating assigned to IGM Financial's senior unsecured debentures is the third highest of the ten rating categories for long-term debt. Under the DBRS long-term rating scale, debt securities rated A (High) are of good credit quality and protection of interest and principal is considered substantial. While this is a favorable rating, entities in the A (High) category may be vulnerable to future events, but qualifying negative factors are considered manageable. A reference to "high" or "low" reflects the relative strength within the rating category, while the absence of either a "high" or "low" designation indicates the rating is placed in the middle of the category.

The Pfd-2 (High) rating assigned to the Corporation's preferred shares is the second highest of the six rating categories for preferred shares. It indicates that the preferred shares are of a satisfactory credit quality and protection of dividends and principal is substantial. The earnings, balance sheet and coverage ratios of borrowers rated Pfd-2 (High) are, however, not as strong as Pfd-1 rated companies. A reference to "high" or "low" reflects the relative strength within the rating category, while the absence of either a "high" or "low" designation indicates the rating is placed in the middle of the category.

(b) Standard & Poor's (S&P)

S&P also has different rating scales for short-term debt, long-term debt and preferred shares in Canada. The "A+" rating assigned to the Corporation's senior unsecured debentures is the third highest of the ten major rating categories for long-term debt and indicates S&P's view that the Corporation's capacity to meet its financial commitment on the obligation is strong, but the obligation is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. S&P uses "+" or "-" designations to indicate the relative standing of securities within a particular ratings category.

The Corporation's preferred shares have been assigned "A-" ratings using S&P's global scale for preferred shares and have also been assigned P-1 (Low) ratings using S&P's Canadian scale for preferred shares, reflecting S&P's view that the Corporation's capacity to meet its financial commitment on the preferred shares is strong, but the preferred shares are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. The "A" rating category is the highest of the nine categories used by S&P on its global preferred share scale. S&P uses "+" or "-" designations to indicate the relative standing of securities within a particular rating category. A preferred share rating on the Canadian scale is a forward-looking opinion of the creditworthiness of an obligor with respect to a specific share obligation issued in the Canadian market, relative to preferred shares issued by other issuers in the Canadian market. The P-1 rating category is the highest of the eight categories used by S&P on its Canadian preferred share scale. A reference to "high" or "low" reflects the relative strength within the rating category.

Payments to Rating Organizations

Payments were made to DBRS and S&P by the Corporation in the last two years to maintain an issuer rating on the Company and to rate publicly distributed debt, including unsecured debentures and preferred shares. The Company expects that DBRS and S&P will continue to provide these services in 2013.
