# NON-IFRS FINANCIAL MEASURES AND ADDITIONAL IFRS MEASURES

- Net earnings available to common shareholders, which is an additional measure in accordance with IFRS, may be subdivided into two components consisting of:
  - Operating earnings available to common shareholders; and
  - Other items, which include the after-tax impact of any item that management considers to be of a non-recurring nature or that could make the period-over-period comparison of results from operations less meaningful.
- This report may also contain non-IFRS financial measures. Non-IFRS financial measures are used to provide management and investors with additional measures of performance. However, we caution that non-IFRS financial measures do not have standard meanings prescribed by IFRS and are not directly comparable to similar measures used by other companies. Specific instances of such measures that may be referred to within this document include “Operating Earnings”, “Operating Earnings per Share” and “Earnings before Interest and Taxes” (EBIT).
- We refer you to the appropriate reconciliation in the Management’s Discussion and Analysis of these non-IFRS financial measures to measures prescribed by IFRS.

2. Shading denotes performance (Eq. + Bal/FI Threshold: 110/30 bps); Green - Above threshold, Light Green - 0 to threshold, Orange - 0 to negative threshold and Red - Below negative threshold.

This graphic illustrates the Gross Return Above Index returns of the Investors Group mandates (being the difference in their returns, gross of fees, relative to their internal benchmark indices) for the performance periods ended December 31, 2015. These mandates are advised exclusively by I.G. Investment Management, Ltd. and its affiliates. Management believes that a comparison using gross returns is more reflective of investment performance relative to each fund mandate's comparative index. The actual performance between corporate class and non-corporate class alternatives for each fund mandate may vary.

This is for illustrative purposes only to assist in assessing the portfolio management capabilities of I.G. Investment Management, Ltd. and its affiliates [generally] and is not intended to provide performance information to investors considering investing in one or more Investors Group funds. For this reason, individual fund names have been removed. The internal benchmark indices used for this comparison have been applied consistently in respect of each fund mandate over the time periods shown. As these indices are intended to provide a reasonable point of comparison for each mandate's specific investment strategy, they are not widely-recognized and publicly available indices in every case. These indices will be made available upon request.
