Forward-looking statements are provided for the purposes of assisting the reader in understanding the Corporation's financial position and results of operations as at and for the periods ended on certain dates and to present information about management's current expectations and plans relating to the future and readers are cautioned that such statements may not be appropriate for other purposes. These statements may include, without limitation, statements regarding the operations, business, financial condition, expected financial results, performance, prospects, opportunities, priorities, targets, goals, ongoing objectives, strategies and outlook of the Corporation and its subsidiaries, as well as the outlook for North American and international economies, for the current fiscal year and subsequent periods. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "plans", "believes", "estimates", "seeks", "intends", "targets", "projects", "forecasts" or negative versions thereof and other similar expressions, or future or conditional verbs such as "may", "will", "should", "would" and "could".

This information is based upon certain material factors or assumptions that were applied in drawing a conclusion or making a forecast or projection as reflected in the forward-looking statements, including the perception of historical trends, current conditions and expected future developments, as well as other factors that are believed to be appropriate in the circumstances. While the Corporation considers these assumptions to be reasonable based on information currently available to management, they may prove to be incorrect.

By its nature, this information is subject to inherent risks and uncertainties that may be general or specific and which give rise to the possibility that expectations, forecasts, predictions, projections or conclusions will not prove to be accurate, that assumptions may not be correct and that objectives, strategic goals and priorities will not be achieved.

A variety of factors, many of which are beyond the Corporation's and its subsidiaries' control, affect the operations, performance and results of the Corporation, and its subsidiaries, and their businesses, and could cause actual results to differ materially from current expectations of estimated or anticipated events or results. These factors include, but are not limited to: the impact or unanticipated impact of general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, management of market liquidity and funding risks, changes in accounting policies and methods used to report financial condition (including uncertainties associated with critical accounting assumptions and estimates), the effect of applying future accounting changes, operational and reputational risks, business competition, technological change, changes in government regulations and legislation, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, the Corporation's and its subsidiaries' ability to complete strategic transactions, integrate acquisitions and implement other growth strategies, and the Corporation's and its subsidiaries' success in anticipating and managing the foregoing factors.

The reader is cautioned that the foregoing list of factors is not exhaustive of the factors that may affect any of the Corporation's forward-looking statements. The reader is also cautioned to consider these

and other factors, uncertainties and potential events carefully and not place undue reliance on forward-looking statements.

Other than as specifically required by applicable Canadian law, the Corporation undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made, or to reflect the occurrence of unanticipated events, whether as a result of new information, future events or results, or otherwise.

Additional information about the risks and uncertainties of the Corporation's business and material factors or assumptions on which information contained in forward-looking statements is based is provided in its disclosure materials, including this Annual Information Form and its most recent Management's Discussion and Analysis, filed with the securities regulatory authorities in Canada, available at [www.sedar.com](http://www.sedar.com).

## Non-IFRS Financial Measures and Additional IFRS Measures

This Annual Information Form and the documents incorporated by reference contain non-IFRS financial measures and additional IFRS measures. Net earnings available to common shareholders, which is an additional measure in accordance with International Financial Reporting Standards (IFRS), may be subdivided into two components consisting of:

- operating earnings available to common shareholders; and
- other items, which include the after-tax impact of any item that management considers to be of a non-recurring nature or that could make the period-over-period comparison of results from operations less meaningful.

Terms by which non-IFRS financial measures are identified include but are not limited to "operating earnings available to common shareholders", "operating earnings per share", "operating return on average common equity" and other similar expressions used to provide management and investors with additional measures to assess earnings performance. As well, "earnings before interest and taxes (EBIT)", "earnings before interest, taxes, depreciation and amortization (EBITDA)" and "adjusted earnings before interest, taxes, depreciation and amortization (Adjusted EBITDA)" are non-IFRS financial measures used to provide management, investors and investment analysts with additional measures to evaluate and analyze the Corporation's results. EBITDA is a common measure used in the asset management industry to assess profitability before the impact of different financing methods, income taxes, depreciation of capital assets and amortization of intangible assets. Other items of a non-recurring nature, or that could make the period-over-period comparison of results from operations less meaningful, are further excluded to arrive at Adjusted EBITDA. However, non-IFRS financial measures do not have standard meanings prescribed by IFRS and are not directly comparable to similar measures used by other companies. Please refer to the appropriate reconciliations of these non-IFRS financial measures to measures prescribed by IFRS in Tables 1 and 2 on pages 18 and 19 of the 2013 Annual Report.

Terms by which additional IFRS measures are identified include "earnings before income taxes and discontinued operations", "net earnings from continuing operations" and "net earnings available to common shareholders". Additional IFRS measures are used to provide management and investors with additional measures to assess earnings performance. These measures are considered additional IFRS measures as they are in addition to the minimum line items required by IFRS and are relevant to an understanding of the entity's financial performance.

**Ratings**

The following table sets out ratings<sup>(1)</sup> given to the Corporation's outstanding securities as at December 31, 2013:

Specific Securities	DBRS	S&P
Long-term Debt (unsecured debentures)	A (High)	A+
Preferred Shares	Pfd-2 (High)	A- / P-1 (Low)

<sup>(1)</sup> The rating trend of DBRS and the S&P rating outlook are both "stable" for the securities and/or issuer.

Credit ratings are intended to provide investors with an independent measure of the credit quality of the securities of a company and are indicators of the likelihood of payment and the capacity of a company to meet its obligations in accordance with the terms of each obligation. Descriptions of the rating categories for each of the agencies set forth below have been obtained from the respective rating agencies' websites.

These ratings are not a recommendation to buy, sell or hold the securities of the Corporation and do not address market price, nor other factors that might determine suitability of a specific security for a particular investor. The ratings also may not reflect the potential impact of all risks on the value of securities and are subject to revision or withdrawal at any time by the rating organization.

#### **(a) Dominion Bond Rating Services (DBRS)**

DBRS has different rating scales for short-term debt, long-term debt and preferred shares. The DBRS long-term obligation rating scale provides an opinion on the risk of default, which is the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims.

The DBRS preferred share rating scale is used in the Canadian securities market and is meant to give an indication of the risk that a borrower will not fulfill its full obligations in a timely manner, with respect to both dividend and principal commitments. Every DBRS rating is based on quantitative and qualitative considerations relevant to the borrowing entity.

Most rating categories are denoted by the sub-categories “high” and “low”. The absence of either a “high” or “low” designation indicates the rating is in the middle of the category. Rating trends provide guidance in respect of DBRS’ opinion regarding the outlook for the rating in question, with rating trends falling into one of three categories – “Positive”, “Stable” or “Negative”. The rating trend indicates the direction in which DBRS considers the rating is headed should present tendencies continue, or in some cases, unless challenges are addressed. In general, the DBRS view is based primarily on an evaluation of the issuing entity itself, but may also include consideration of the outlook for the industry or industries in which the issuing entity operates.

The A (High) rating assigned to IGM Financial’s senior unsecured debentures is the fifth highest of 26 ratings used by DBRS for long-term debt. Under the DBRS long-term rating scale, debt securities rated A (High) are of good credit quality and the capacity for the payment of financial obligations is substantial. While this is a favorable rating, entities in the A (High) category may be vulnerable to future events, but qualifying negative factors are considered manageable.

The Pfd-2 (High) rating assigned to the Corporation’s preferred shares is the fourth highest of 16 ratings used by DBRS for preferred shares. Under the DBRS preferred share rating scale, preferred shares rated Pfd-2 (High) are of a satisfactory credit quality and protection of dividends and principal is substantial. The earnings,

balance sheet and coverage ratios of borrowers rated Pfd-2 (High) are, however, not as strong as Pfd-1 rated companies.

#### **(b) Standard & Poor’s (S&P)**

S&P also has different rating scales for short-term debt, long-term debt and preferred shares in Canada. S&P’s issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations or a specific financial program. Long-term issue credit ratings are based, in varying degrees, on S&P’s analysis of:

- (i) the likelihood of payment (capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation),
- (ii) the nature and provisions of the obligation, and
- (iii) the protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization or other arrangement under the laws of bankruptcy and other laws affecting creditors’ rights.

Long-term issue credit ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default.

The S&P Canadian preferred share rating scale serves issuers, investors and intermediaries in the Canadian financial markets by expressing preferred share ratings (determined in accordance with global rating criteria) in terms of rating symbols that have been actively used in the Canadian market over a number of years. There is a direct correspondence between the specific ratings assigned on the Canadian preferred share scale and the various rating levels on the global debt rating scale of S&P. The Canadian rating is fully determined by the applicable global rating and there are no additional analytical criteria associated with the determination of ratings on the Canadian scale. It is the practice of S&P to present an issuer’s preferred share ratings on both the global rating scale and on the Canadian rating scale when listing the ratings for a particular issuer.

Most ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major letter rating categories. An S&P rating

outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future credit watch action.

The “A+” rating assigned to the Corporation’s senior unsecured debentures is the fifth highest of the 22 ratings used by S&P in its long-term issue credit rating scale. A debenture rated A+ indicates S&P’s view that the Corporation’s capacity to meet its financial commitment on the obligation is strong, but the obligation is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories.

The Corporation’s preferred shares have been assigned “A-” ratings using S&P’s global scale for preferred shares and have also been assigned P-1 (Low) ratings using S&P’s Canadian scale for preferred shares. A P-1 (Low) rating is the third highest of 18 ratings used by S&P in its Canadian preferred share rating scale. An A- rating is the fifth highest of 20 ratings used by S&P in its global preferred share rating scale. A preferred share rating of A- reflects S&P’s view that the Corporation’s capacity to meet its financial commitment on the preferred shares is strong, but the preferred shares are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories.

#### **Payments to Rating Organizations**

Payments were made to DBRS and S&P by the Corporation in the last two years to maintain an issuer rating on the Company and to rate publicly distributed debt, including unsecured debentures and preferred shares. The Company expects that DBRS and S&P will continue to provide these services in 2014.
